

Ohio's Oral Health Status

Oral Health Ohio envisions a state where all Ohioans enjoy optimal oral health as part of overall health and well-being across their lifespan. This infographic illustrates the oral health status of Ohioans when compared to the nation's performance on 12 key oral health indicators. While Ohio performs above the national average on some indicators, too many Ohioans do not get the care they need. This is especially true for young children and older adults.

(age 65+ in Ohio) have lost **all natural teeth** due to tooth decay or gum disease.¹

(age 65+ in Ohio) have reportedly lost **6 or more teeth** due to tooth decay or gum disease.²

(age 65+ in Ohio) reportedly visited a dentist within the past year.³

on community water systems (CWS) in Ohio received optimally fluoridated water.⁴
